

Cable drag chain specification

1. Dimension definition :

$$\text{Length} = \text{number of Mesh} * \text{Pitch}$$

2. Type of Megus cable drag chain :

2-1. General type cable drag chain

Material:

Megus cable drag chains are made by high quality plastic injection molding process, and the mounting flange is made of heavy metal punching process.

Occasions:

- The cable drag chain structure is easily opened by the operator while the cable maintaining process.
- The cable drag chain material is basically anti-corrosion and it is not easy to deformed while suffer in heavy pressure.
- The cable drag chain length is customized design by customer demand.
